WHAT YOU NEED TO KNOW ABOUT THE SEE REGION?

SEE Legal Group embraces 12 countries, which form a large market of 145 million consumers.

The Group spreads between Central Europe and the Middle East covering an area with a growing network of infrastructural links that is yet to reach EU standards of infrastructural density.

All countries of the region are orientated towards the EU, either as Member States or as candidates or aspiring states. This convergence reflects on laws and regulations, and enables business to move and act more easily across Southeast Europe.

Increased level of trade and positive financing conditions, after the global economic crisis, stimulate investments and consumption in the SEE region.

Trade in the SEE is also boosted by regional trade agreements like CEFTA and initiatives sponsored by global institutions such as the World Bank. Countries of the Western Balkans within the SEE discuss creation of a regional economic area following the Berlin Process and summit in Trieste.

Growing economic activity resulted in decrease of unemployment rates. Generally, well-educated local workforce possesses entrepreneurial spirit – self-employment participates considerably in the total employment increase in some parts of the SEE.

Expansion of local economies has reduced gaps within the SEE region while fostering tighter connections between the countries. This has prompted corporate players to act regionally and increase the number of cross-border deals.

The SEE Legal Group with its 10 members from 12 different countries and its specialized practice groups offers integrated cross-border and regional legal services in a wide array of practice areas and industries.

ONE REGION, ONE SERVICE, ONE GROUP
